Croydon, PA 19021 | +1 (445) 290-9131 | Dnp432@gmail.com | linkedin.com/in/dhruvilptl07

Education

Bachelor of Science in Electrical and Computer Engineering

Temple University, College of Engineering

August 2025 - May 2029

Philadelphia, PA

Experience

Electrical Engineering Intern

US Navy – Naval Sea Systems Command (NAVSEA)

June 2025 – August 2025

Philadelphia, PA

- Designed, hard-wired, and assembled a multi-module test stand simulating 6 shipboard subsystems, allowing engineers to reproduce real failure scenarios without accessing live equipment
- Optimized 12+ PLC test procedures, reducing verification time per system by ~28% and improving repeatability across test cycles
- Logged and analyzed 50+ test runs, identifying 3 recurring failure patterns that informed updates in standard testing protocols
- Collaborated with engineers to strengthen testing methods used across naval platforms through hands-on system troubleshooting
- Authored a 9-page technical procedure guide, now used as reference material for future interns and lab personnel

Projects

Incubator Project, Python

November 2025 – December 2025

- Programmed a Micro:bit to sample temperature data every 2 seconds and transmit the reading to an external display with $\pm 5^\circ\text{C}$ accuracy
- Designed a custom 3D-printed a mounting system that reduced sensor movement by ~80%, improving measurement stability during operation
- Logged and graphed 300+ data points to calibrate the sensor and verify consistent performance over time

Custom Environmental Monitoring Circuit Project, (PCB+, Microcontroller, Python)

April 2025 – November 2025

- Designed a custom PCB integrating a microcontroller, temperature sensor, humidity sensor, voltage regulation circuit, and signal-stabilizing components
- Soldered and assembled 25+ components, including resistors, capacitors, and sensor modules, onto the board
- Programmed the microcontroller in Python to sample environmental data every 1 second and transmit it via serial to a laptop dashboard
- Built a live Python dashboard that graphed real-time data and logged 10,000+ readings for performance analysis

Skills

Technical: Programmable Logic Controllers (PLCs), Python, VEX Code, Circuit Assembly & Wiring, Digital Electronics, Electrical Test Procedures, Microcontroller Programming (MicroPython)

Engineering: Soldering, Circuit Design, Multimeters, Oscilloscopes, AutoCAD, Fusion, PCB layout, Microsoft Excel

Professional: Communication, Adaptability, Critical Thinking, Attention to Detail, Receptiveness, Collaboration

Extracurricular

President

BAPS Campus Fellowship Club, Temple University

October 2025 – Present

Philadelphia, PA

- Plan and lead weekly campus hangouts and goshthi(hindu spiritual talks) that give students a space to share experiences, discuss Hindu values, and reflect on balancing college life with faith
- Coordinate cultural events and service projects, including the annual Diwali Celebration, to promote Hindu heritage and foster community on campus

Networking Lead

BAPS Hindu Temple

March 2022 – Present

Levittown, PA

- Coordinate weekly assemblies for 30+ youths by organizing schedules, speakers, and interactive discussions on Hindu beliefs and culture
- Manage outreach and communication efforts to keep the youth community engaged and connected
